

Dear Valued Customers and Suppliers:

Orlando Precision Announces the acquisition Gifford Spring Company

Huntington Beach, CA (August 1, 2024) – Orlando Precision, a leading provider of highly engineered springs, machined parts, wire forms and other precision components for the aerospace, medical, electronic and defense industries, is excited to announce our first expansion outside of California with the acquisition Gifford Spring Company, located in Garland, TX.

Gifford Spring has been proudly serving the aerospace, telecommunication and industrial sectors with springs and wire forms since 1984. They feature a wide array of quality custom springs including compression springs, tapered springs, torsion and double torsion springs, extension springs and wire forms, along with an expertise in rod forming.

"The Gifford Spring brand has an excellent reputation for quality, customer service and on-time delivery. The acquisition broadens our geographic footprint, allowing us to better serve markets and customers located in Texas and throughout the south, including central Mexico. Additionally, it adds valuable capabilities to our organization, enhancing our overall capacity to innovate, deliver services, and achieve strategic goals." explains Frank Mauro, President, Orlando Precision.

About Orlando Precision

Orlando Precision is grounded in experience and forward-thinking in its approach. Founded in 1957, the company was acquired in 2009 by Crosse Partners, an established equity partnership, in order to grow and establish Orlando's exceptional reputation in the industry. Orlando has quickly become the leader in vertically integrated, custom spring and wire-form manufacturing for aerospace, medical, electronic and defense industries along with the additional capabilities of progressive die stamping and a complete in-house machine shop.

About Gifford Spring Company

In 1984, Ralph Gifford believed he could create a better, customer focused, custom precision spring manufacturing business. Starting with one machine in his garage and a handful of customers, Gifford Spring Company was born. Driven by Ralph's integrity, leadership and performance excellence, his company very quickly outgrew the garage and moved to Gold Street in Garland, Texas, where the facility remains today. His legacy was continued by his children and grandchildren..
